

Task Management System

User Stories

1. As a user, I want to sign up so that I become registered in the database and be able to access the system

Acceptance Criteria

- User should be stored in database correctly when
Entering a valid sign-up details
- User should get an access token and see the home page

2. As a user, I want to login so that I can access the system

Acceptance Criteria

- User should get an access token and see the home page
if he is registered in the database

3. As a user, I want to create a task so I can track it

Acceptance Criteria

- Task should be stored in the database
- Task should be linked with the user

4. As a user, I want to assign a priority for a task so I can remember which tasks to begin with

Acceptance Criteria

- Task priority should be stored in the database
- Default priority should be medium

5. As a user, I want to assign a status for the task so that I can know my current progress

Acceptance Criteria

- Task status should be stored in the database
- Default status should be TODO

6. As a user, I want to filter tasks by status so that I can visually see each progress of the tasks

Acceptance Criteria

- Tasks with the chosen status should be queried from the database
- Tasks with the chosen status should be visible in the front-end

7. As a user, I want to filter tasks by priority so that I can visually see the most important or less important tasks

Acceptance Criteria

- Tasks with the chosen priority should be queried from the database
- Tasks with the chosen priority should be visible in the front-end
